On the Course...

Scott Palmer
Golf Course Superintendent

As we make our transition from actively growing Tifeagle to semi dormant eagle, ball mark repair becomes very important. Bermudagrass regenerates from stolons and underground rhizomes. Fixed ball marks on this surface will disappear more quickly because of this. During the winter, eagle growth is significantly slowed

and in late winter, can stop completely. So the golfer must be even more attentive to her/his ball marks. Please fix your ball marks and one more if you see it and help keep this problem in check all winter.

Range Renovation

We are improving our range steps! Take a look at the before and after.

A word from our Pro...

Lacey Fears
Head Golf Professional

Members, I wanted to thank you all for how supportive you have been of Junior golf at our club! We have been able to teach over 100 juniors ages 7-18 in our junior academies plus more from PGA Jr. League in these short 2 years I have been here. That is incredible and we couldn't do it without such a great membership base.

With spring around the corner, you may see our local high school's (Perry, Veterans & Westfield) golf teams practicing and playing. We have done our best to strategically schedule them in a way that minimally disrupts member play. I want to encourage you to get to know players and coaches if you're able as we have some awfully talented young players that call HLCC home!

Hello everybody! I hope everyone is having a great start to the beautiful year and keeping up with their New Year's resolutions. With the first month of the new year behind us, we're now in the great month of February. Let's talk about this month's flower, the Amaryllis Lily, better known as the Jersey Lily.

The Jersey Lily goes by many other names too, but a more known name would be the Naked Lady. This flower originated in South Africa and are incredible pollinators, attracting insects with its large colorful flowers and tasteful nectar. Certain species of lily are pollinated by wind, while others are pollinated by bees.

Just like Daffodils and Azaleas, the Jersey Lily is poisonous to pets, especially to cats. It contains a variety of toxic alkaloids such as pancracine and vitta-tine, with the most

Quote of the Month:

"Hold fast to dreams, for if dreams die, life is a broken winged bird that cannot fly." - Langston Hughes

prevalent being lycorine. When it comes to humans, every part of the flower is poisonous and can be harmful if ingested.

The Jersey Lily is drought-tolerant, meaning once the plant is fully established, it is able to withstand long periods of dryness and no rain for weeks and in some rare cases an entire growing season in between deep watering.

Always remember, if you have any questions, please feel free to ask me!

Chef

Jason

Delasota, CEC

Hello, members!

With 2021 a month behind us and the reset buttons being punched, we are excited to announce that our February wine dinner will be an Italian themed event.

We are going to serve 5 courses of delicious warm Italian food, perfect for this cooler weather. Ok, before I go any further, can we just recognize that the DAWGS are national CHAMPIONS!!! Makin' a Georgian proud!

Please check out the menu on the right and make plans to be with us! Note, this is a ticketed event.

To get your tickets, you can contact the office by emailing them at info@houstonlake.com.

Did you know, as members, you can member charge your tickets? They will put it on your account, mail your tickets to you (or you can pick them up in the Pro Shop), and we'll have you on our list! The cost of your tickets will just show up on your next statement. This event will sell out quickly. So email us today!
